

G-Shot 1400

14MP Digital Camera

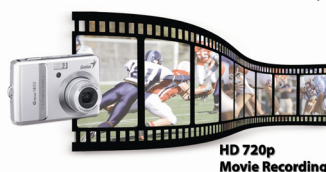

G-Shot 1400 features HDR (High Dynamic Range) image enhancement technology for photo scenes where some areas are brightly lit and others much less so. It uses a true color filtered 14 mega-pixel sensor, has a 2.7" color display, and 3x optical zoom and 30 vivid scenes so you can turn yourself into a professional photographer.

Features include anti-shaking to avoid any blurring when holding the camera by hand, an intelligent mode that detects particular types of scenes and chooses the appropriate camera settings. LOMO effects like dark-corners, off-kilter exposure, and over-saturated colors to your snapshots can turn your images into gallery-worthy works of art. A fish lens feature can give you a wide-angle hemispherical view of your photographic subjects for more fun. G-Shot 1400 take beautiful photos and can record video clips in 720p high-definition for all moments. For more details, contact your sales representative.

Features:

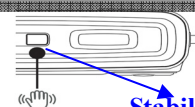

- 14 MP Sensor
- 2.7" TFT LCD
- 3x optical zoom; 5x digital zoom
- 720P HD Video function
- High speed burst
- Pre-recording function
- Anti-Shaking/Smile/Blinking detection
- Intelligent mode
- Aperture Priority
- Supports HCSD card up to 32GB
